

## Bagasse

Environmentally Friendly product made out of natural fibers of the sugar pulp, degrades in 90 days. It's biodegradable and compostable. Resists microwave up to 300 F. resists refrigeration. Made with worldwide patented technology that doesn't create any chemical pollution. Fibers are separated through mechanical reactions instead of chemical means; therefore making it an environmentally friendly process. Has a 2 year shelf life in stable humidity and temperature conditions.
